

13. If $j = 3$ and $k = 6$, solve
(1 Point)

$$j^2 + (13 - k)$$

Enter your answer

14. Simplify
(1 Point)

$$5(5h + 3k)$$

Enter your answer

15. What is the coefficient in this expression?
(1 Point)

$$5x + 3$$

Enter your answer

16. What is the constant in this expression?
(1 Point)

$$5x + 3$$

Enter your answer
